Highly experienced Senior Software Engineer specializing in Node.js and React, seeking to utilize extensive experience to build scalable, reliable, maintainable, and secure web applications. Leveraging a deep understanding of full-stack development, my goal is to contribute advanced skills in JavaScript/TypeScript and modern web development frameworks to deliver high-performance software solutions that provide outstanding user experiences.

PROFESSIONAL EXPERIENCE

Clinchd,   **Remote, United Kingdom**
Senior Software Engineer - Contractor   *October 2021 - November 2022*

- Doubled the speed of new feature development, delivering 20+ features within 9 months.
- Developed and implemented a payment service using Stripe API, facilitating customer subscription payments.
- Introduced a filtering module enhancing speed by x10 and reducing the previous implementation's code complexity.
- Integrated logging and tracing to the front-end application, aiding in identifying and debugging 20+ production bugs.
- Conducted application refactoring to improve code readability, reduce complexity, and fix bugs.

Persidius Systems   **Remote, Romania**
Senior Software Engineer – Contractor   *May 2020 - February 2021*

- Developed applications used by 64 Romanian local public administrations, managing waste tax declarations and waste from 175,000+ households.
- Created a real-time position tracking system to oversee a fleet of 50+ garbage trucks via a web admin panel.
- Developed a visual map using Google Maps API to display the real-time status of over 1 million waste bins.
- Designed a bi-temporal data model to rewind the tax declaration to "as it actually was" in combination with "as it was recorded" at some point in time.

Mind Treat Studios   **Bucharest, Romania**
Senior Software Developer   *July 2018 - May 2020*

- Managed development of 7+ projects for major clients including Carrefour, Coca-Cola, and Oskar.
- Led a team of 5 developers, each working on diverse projects and technologies, delivering creative digital solutions.
- Built a scalable application to distribute vouchers for Carrefour's 18th anniversary to over 100,000 users, managing 10,000+ concurrent connections.

SKILLS
